

A *project management methodology* tells you how to manage your projects throughout the complete Project Lifecycle. It describes every step in the life cycle phases and the processes in depth, so that you and your team know exactly which tasks to complete, what to do, when and how. It should also provide the Project Manager and Team with the appropriate templates to action, record or communicate effectively. Providing case studies or examples to deal with issues or problems as they arise within the methodology is also deemed necessary and extremely useful.

Why do you need one?

As a Project Manager, you need a Project Management Methodology to **manage** your projects **consistently effectively** and **efficiently**. It thus helps help you to manage projects in a **structured** and **repeatable** manner. In the Corporate environment, it ensures all company projects are done in the same "successful" way, and when issues arise, the project managers and teams **react quickly** and **in accordance with established procedures**. In that way, you can apply the same successful approach to every project you undertake, and consistently meet and **comply with corporate governance requirements**.

What is MPMM™?

[Reference Brochure](#); [Links to MPMM™ website](#) & [Demo Video](#)

MPMM™ is a Project Management Methodology containing tasks, charts, tables and examples to help guide your projects towards success. It provides the complete [Project Management Toolkit](#) which includes an entire [Project Management Life Cycle](#). It also provides all the [Project Management Processes](#), as well as all of the [Project Management Templates](#) forms and checklists needed. Several [Project Management Case Studies](#) are included which serve as examples and "lessons learnt" references. The Professional and Enterprise Edition allows you to customise the methodology to your own requirements and to embed your own unique project templates and "lessons learnt" there-in, via the [Project Management Methodology Manager](#). Whether you use the standard **MPMM™** Methodology as the company standard, or customise and develop your own version, **MPMM™** provides the tool to do it with!

[MPMM™ Product Features & Indicative Cost](#) & [Astidian Project Management Value-add Services Offer](#)

Buying on our **MPMM™** Reseller Agreement basis, you can achieve a 10% Discount on the Current Ruling Prices at **MPMM™** for any of their Products. [Mail us](#) at or [Contact Astidian Systems](#) for a Reseller Discount Code.

At the same time we can add value to your PSO & Project effort by providing the services noted above in our Services Value-add offer.
